Konstantin Terekhin

Phone: +380662906959 / Email: terekhin.konst@gmail.com

EDUCATION

- **IELTS General** - 7.5 / **CEFR level** - C1
- **Zaporizhzhya National Technical University.** Master's degree in electrical engineering.

TECH STACK/LIBRARIES USED

- React.js(Hooks/Context API), Node.JS(Express), MongoDB
- SASS/SCSS, Bootstrap, vanilla JS(google maps API, youtube API, sliders, various buttons)

PROJECTS

BURGER BUILDER

- WEBPAGE
- GITHUB REPO

- Full stack JS application. The app allows the user to see the preview of his order and any item changes being implemented straight away on the page.

- *Key features:*
  - Login / Registration using JWT. Back-end routes for storing and retrieving user details and order history in MongoDB.
  - Interactive burger UI with the live item and cost updates.
  - Private routes for logged in users only. Setting login token into global header once the user is authenticated.
  - Validation and error handling on client and server side
  - Slider modal for order confirmation

kobzar-logic.com

- **WEBPAGE**
- **GITHUB REPO**

- Freelance job**.** New mockup for the online shop kobzar-logic. All pages are cross browser and fully responsive. The pages were built from PSDs and Figma sketches.

AMAZING COCKTAIL

- WEBPAGE
- GITHUB REPO

- Vanilla JS application with 3rd party API. It is an app to find any drink, it's ingredients and preparation using
https://www.thecocktaildb.com/api.

- *Key features:*
  - Multiple search categories and asynchronous interaction with API.
  - DOM updates on server response and lifecycle changes.
  - Saving favorites list to the local storage and updating page's DOM on local storage change.
